(306) 682-2583

Boarding Consent Form

For your pet to stay with us they must be up to date on vaccinations:

- Dogs must have an annual vaccination with **distemper/parvo and kennel cough and rabies** vaccination every 3 years after the initial booster at a year.
- Cats must be vaccinated every year with a **rabies and upper respiratory virus vaccine**.

Animal Health Clinic of Humboldt is a veterinary clinic and as such deals with sick, potentially contagious animals. Although control measures are in place to minimize the spread of illness between animals housed in the clinic there is no guarantee that this will not occur. Excessive barking will not be tolerated, therefore behavior modification or sedation may be used.

If your pet is found to have a parasitic infection such as worms, lice, fleas or ticks during their time here they will be treated at the owner's expense to prevent spread to other animals.

If your pet causes damage to the property during the time of stay you are liable to pay a fee that is appropriate for the damage caused.
